### OMBRA NR 2 COASTER

\$85

#### DESCRIPTION

This elegant coaster is part of a series called Ombra ("shadow" in Italian) that draws inspiration from the iconic architecture of Venetian 16th century palaces. These elegant cutout decorations over a copper square are directly inspired by the iconic windows of Palazzo del Doge facing Piazza San Marco, but their interpretation in a modern fashion creates a timeless abstraction that will complement both a classic and a contemporary home. Either with identical ones or mixed-and-matched with the other three designs from this series, this piece will be eye-catching and refined.
