## DESCRIPTION

Part of a superb collection of unique pieces designed by iconic master Gio Ponti, artistic director of the Richard Ginori factory from 1923 to 1933, this stunning vase boasts a timeless decoration that combines Far East allure with patterns of classical perspective expressed with exquisite craftsmanship and boasting an eye-catching color combination. This piece was crafted of porcelain and its sinuous shape is enlivened with a series of blue squares surrounded by yellow frames with a trompe l'oeil effect that creates the illusion of compartments, each containing a different object.
