ORIGAMI LIVING TABLE BY PATRICIA URQUIOLA

\$13,030

DESCRIPTION

As if marble were paper, the collection of living tables is inspired by the ancient Japanese origami: the table top makes a 90° bend becoming the vertical support, in a graphic game of continuity and colour. Thanks to the eclectic design of Patricia Urquiola and her collaboration with the masterful experts at Budri, the two stones used here - pink onyx and onyx Nuvolato - bend at a 90-degree angle to create both the top and its support. The delicate color combination strikingly contrasts with the contemporary silhouette of this bold piece, which will be an eye-catching piece in any decor.
