ORIGAMI RHODIUM BRACELET

\$230

DESCRIPTION

The cut-out design of this stunning bracelet is inspired by the folded paper creations of Origami, the traditional Japanese art that gives its name to this collection. The structure was crafted by hand of brass with a rhodium plate, its rigorous structure obtained with joints that allows the piece to be flexible, guaranteeing a comfortable fit. The pale glow of rhodium adds a bright accent to any attire, from the most minimalist to a most intricate and layered. It can be combined with other Noshi bracelets, either rhodium- or gold-plated for a stunning effect.
