PABLITA SCULPTURAL VASE

\$2,250

DESCRIPTION

This striking vase is part of a limited series of only twelve pieces that pay homage to Pablo Picasso. Its woman-like forms are made in brass and their sinuous shapes evoke the poetic simplicity of the great painter's works. The arms and the charming vase that the woman carries are made in copper and create a playful addition to this piece that can also be used as a vase, thanks to the practical opening on the half-spherical head.
