PAILLETTES MODULAR WALL COVERING

\$80

DESCRIPTION

A sophisticated way to visually divide and define areas in a loft or large interior, this wall covering module from the Cinetica Collection designed by Studio Lido will add brightness and glamour to modern or mid-century decors. Crafted of high-quality pewter (95% tin, 4.5% antimony and 0.5% copper) by Marinoni Peltro, this module boasts a triangular profile covered with differently sized disks set at an angle to create a highly reflective surface with a three-dimensional spiral look. The modules can be combined in any size to suit specific interior needs.
