PALM CONSOLE

\$9,625

DESCRIPTION

Piero Angelo Orecchioni designed this elegant and fanciful console presented at the 2019 edition of Milan's Salone del Mobile. The two juxtaposed tops are in wood with black lacquer at the bottom and extra transparent glass at the top. They are both supported by three brushed brass bars on one end and flared ceramic cones in light blue and gray on the other side for a striking asymmetrical effect. The combination of these materials can be mixed and matched as desired, please contact the Concierge for details with customizations.
