PANTELLERIA TWO LAVAS JAR

\$805

DESCRIPTION

The accent on this vase is made with two types of lava rocks with different melting point from the island of Pantelleria in Italy. The inside is coated with a transparent glaze. About the collection The volcanic series is a visual and physical study of volcanoes. The body of the vessels is made of stoneware and turned at the wheel. The liquid appearance of the rock glaze is an immediate reminder of the fire and heat that made both the lava rocks and the vessels.
