Galleria Romanelli

PANTERA SMALL BRONZE SCULPTURE

\$1,810

DESCRIPTION

This original model of this bronze sculpture depicting a panther belongs to the Gallery's famous historic collection. The panther's muscles were modeled in detail and fused in bronze employing the traditional lost-wax technique, the same used during the Renaissance by artists such as Donatello and Benvenuto Cellini. The piece is finished with a chiseling, which highlights the various details, and a protective glazing, which highlights the volumes.
