### PEAR WOOD DESK

\$11,420

#### DESCRIPTION

An age-old tree trunk from the Austrian region of Mostviertel, known for fruit tree cultivation, finds a new life in this singular desk. Raised on two sturdy iron legs, this piece combines a trunk from a pear trunk aged 175 years with a smoky glass top, whose silhouette follows the natural shape of the wood. The idea behind this piece lies in the fact that in the past the pear wood was used to make Murano blown glass molds. The result is aesthetically and visually fascinating, enhanced by the wax oil treatment of the wood.
