PIATTI QUADRATI OPALESCENTI ORANGE DINNER PLATE

\$75

DESCRIPTION

Sure to become the focal point of any table setting, this sophisticated dinner plate made of orange opalescent glass belongs to the Piatti Quadrati Collection, named after its modern square ("quadrato" in Italian) shape. Showcasing a stunning marbled look, a distinctive feature of the "vetro pulegoso", the glass is crafted using a technique invented by Leonardo da Vinci in the 16th century that has been handed down over the centuries to a select group of master craftsmen.
