PIOTR CENTERPIECE BY MARTINE BEDIN

\$9,825

DESCRIPTION

This centerpiece has an extroverted and contemporary silhouette. Two different marbles, white Carrara and green marble, compose the conical shape of the main element, creating an intriguing spiral design. The base is made of a large disc of black Portoro marble, surmounted by two smaller discs in white Carrara and black Portoro, whose deep rich black and gold colors create a perfect contrasting accent. The rounded edges and hand-polished surface highlight the pattern of the natural veining, making this piece an exclusive and elegant object that will surely be admired. Design by Martine Bedin, 1983.
