**POMAGAGNON CHAIR**

\$860

## DESCRIPTION

This stunning chair is hand crafted by the masterfully assembling several pieces of antique, recycled wood. The geometric play of dozens of squares artfully joined together, which maintain the wood's natural colors, create a squared, minimalist silhouette, reminiscent of the prominent nature of the Pomagagnon mountain in Ampezzano. The restored wood recovered from old barns shows the signs of the environmental conditions to which it was exposed over time: gray from cold wind and rain, red from the sun. This remarkable piece can be used in a contemporary, industrial decor for an eye-catching contrasting effect.
