Daniele Nannini

PREHISTORIC RHINO SCULPTURE

\$1,610

DESCRIPTION

Crafted by Daniele Nannini using white clay containing kaoline, this sculpture depicts a majestic prehistoric rhino. Modeled by hand, the piece undergoes a partial hardening phase, after which it is hollowed out to obtain a 1 cm thickness. The artist then sands the piece to its imposing volumes to create a smooth finish before placing it in the kiln for a final firing. The elegant matte gray color is obtained with a washable latex paint. This stunning decorative object is powerful and sophisticated and will be a unique addition to a modern interior.
