PRESIDENTIAL OIL BOTTLE IN COPPER AND SILVER

\$390

DESCRIPTION

This sophisticated oil bottle will be a precious addition to any home. It was entirely worked and welded by the hands of expert craftsmen and its copper structure was bonded to pure silver through galvanic thermal induction that mixes the two metals to create an object that will last forever. The elegantly curled spout mirrors the curves of the handle, both flanking the simple shape of the body. This piece is available in different sizes. Please ask the concierge.
