Woodyzody

PULCINO SCULPTURE BY FEDERICO ANGI

\$130

DESCRIPTION

An exercise in pure geometry, this exquisite piece designed by Federico Angi is a stylized sculpture of a chick. Entirely made of natural maple, the untreated wood's grain gives a one-of-a-kind, organic decoration to the piece. Resting on a round base with one dent, which represents its feet, the small bird is made of one wooden sphere that was cut horizontally, with the top part shifted to create the body and head. A minimalist decorative object, this piece will make a statement in a contemporary decor.
