## PULSAR PHOTOGRAPH

\$4,690

### DESCRIPTION

This striking photograph is part of the Vitrum Spatialis project exhibited at the Biennale Arte of Venice in 2019, which takes inspiration from original NASA images of space. Bursting into a mesmerizing warm color palette diagonally cut by a vivid purple flashing light, this work of art is the representation of the artist's abstract expression of the universe. This photograph is traditionally developed and printed using high-tech on Fuji Crystal Pearl HD paper. Covered with Plexiglas (2mm-thick), it is placed on an aluminum Dibond frame (1mm-thick, profile 0.5cm), also available in Slimline.
