RECTANGULAR TRAY WITH CARBON FIBER

\$7,500

DESCRIPTION

Elegant and modern, this tray is crafted in the shape of an octagon with two elongated sides that gives it a rectangular silhouette. The bottom is entirely lined with carbon fiber whose black tones are a sophisticated backdrop for its silver-plated structure, while the raised sides are accented with sleek screw-like elements throughout. This piece can be combined with the Charger and Set of Flatware with Carbon Fiber for a striking effect on the dinner table.
