RIALTO CONSOLE

\$17,465

DESCRIPTION

This sophisticated console combines two elegant materials in a geometric silhouette that has a modern flair and a bold character. This trapezoid-shaped piece is made of poplar covered with eucalyptus wood, whose elongated grain follows the horizontal lines of the top and sides. Inserts of mirrored glass on the front and mirror inlays on the sides create a dynamic effect that plays with the surrounding space, reflecting the light in unique ways.
