## SCOCCA SIDEBOARD

\$33,820

### DESCRIPTION

The Dimensional Control method used to construct automobile frames is here applied to cabinetmaking to create this elegant sideboard with a distinctive, futuristic flair. This exquisitely crafted piece is made of aluminum and will add a strikingly original accent to a contemporary entryway or living room. The sideboard comprises a yellow base made up of interlocking elements that support three cabinets with strikingly irregular volumes for a contrasting effect. It was introduced at the 2019 Milan Design Week and is made to order.
