DESCRIPTION

Stunning in its simplicity, this wonderful ceramic centerpiece will add modern flair to any entryway or study. The distinctive conical shape features an elaborate interplay of flaring and tapering, deftly producing a soft-edged, geometric silhouette that elegantly contrasts with the deep black color and metallic finish. The striking silhouette and rich color are achieved through the "bucchero" firing and glazing techniques, dating back to the Etruscans. Created with master vase-maker Michele Totino in Viterbo.
