SERPENTE CANDLE HOLDER

\$145

DESCRIPTION

This charming piece was entirely executed by the hands of expert craftsmen according to the traditional methods of Capodimonte porcelain, which has been renowned for its delicate decorative objects since the end of the 1700s. In this case, the white shimmering surface of a double-mouthed candle holder is adorned by the coiled body of a red, yellow, and black snake with its striking head up. Italian artisanal excellence and a modern sensibility make this piece an exquisite object.
