SET OF 2 GREEN SIMPLE LOW GLASSES BY IL VETRO DI EMPOLI

\$90

## DESCRIPTION

A superb example of the classic tradition of Empoli glassware, this set of two mouth-blown glasses features a cylindrical shape marked by sinuous depressions made by hand using the bugnato technique. The distinctive green color, called "Verde Empoli", derives from the iron oxide contained in the sands extracted from local water basin used for this specific production. A colorful and original addition to a modern table, this glass can be paired with the high glass and the bottle from the same collection for a stunning artistic display that will not fail to captivate the attention.
