## SET OF FOUR ROUNDED LITTLE RED FISH GLASSES

\$310

### DESCRIPTION

The glasses in this set bear a round shape which bulges at the bottom and tapers at the top, making for a comfortable hold. Featured in each glass is the unique addition of a three-dimensional fish with all of its detail reproduced. The bright red glass fish sits on a barely visible transparent glass support and appears to be floating when the glass is full. These pieces can decorate a table alone or can be combined with the Little Blue Fish glasses for a more colorful look.
