SKYLINE GEOMETRIC BLUE RUG

\$7,910

DESCRIPTION

Evoking the geometry of Fernand Leger's paintings, this remarkable rug effortlessly combines Italian aesthetic sensibility with Tibetan crafting traditions. Made of hand-knotted wool and bamboo-fibers, the stunning geometric design is formed by rows of tall and short three-dimensional squares, alternating pale blue and fossil gray colors. The difference of colors and shapes produces a tactile, dynamic quality that enhances the modernist sophistication and allure of the piece. Customization upon request.
