## SMALL CALICI PEACOCK BLUE VASE

\$600

### DESCRIPTION

The "Calici" collection is inspired by the tipetti glasses historically produced by Salviati. The project emphasizes the preciousness of the material almost as if it was exposed on a pedestal and highlights a contemporary attitude, making the product easily declinable to different aesthetics by replacing the colored element. Each piece is composed of two components: the transparent glass base can serve as a water container, and the colored glass with the rigadin ritorto finish is used for the true protagonist: the suspended chalice.
