SMALL LEATHER THERMAL CARAFE

\$320

DESCRIPTION

Stunning in its simplicity, this refined thermal carafe is an essential addition to a modern kitchenware collection. Crafted entirely of metal, the carafe features a round base that tapers to a narrow top and spout, the curved handle accentuating the sleek geometry of the body, which has a removable leather cover with a zip, allowing for easy removal and wash. The cover's distinct surface texture is achieved with laser, by making a series of cuts on the surface of the leather. A lavish way to serve coffee, this carafe will be a captivating addition to any table setting. Can hold 300ml.
