SOL E LUNA SET OF TWO VASES

\$15,230

DESCRIPTION

On a console, table or mantle, the brilliant shimmer of this lavish glass vase set will make a striking impact in a traditional or modern interior decor. Crafted of crystal and gold Murano glass, the tall silhouettes have straight sides that slightly taper to form a bell-shaped mouth, the fluted surface texture elongating its slender shape. Each vase features an ornate moon or sun that not only connect the vase with the base but create a focal point that enhances the piece's dramatic allure. This piece is ideal for displaying with long-stem flowers for an elegant touch.
