## SPINNING TOP IN EBONY WITH MAPLE AND ERABLE INLAYS

\$530

### DESCRIPTION

Defined by a long, delicate stem and a disk-shaped body, this spinning top boasts a stunning Camerun ebony wood body enriched with black-stained inserts in maple and erable woods treated with high-quality wax and oil. The deceptively simple design results from a complex construction whereby very thin layers of wood are glued together and worked into a rich texture that recalls optical fabric. A soft red silicone ring around the equator and a steel tip with the company logo add a bold contrast that enhances this unique design.
