STEN SKIS

\$4,560

DESCRIPTION

Combining high technical features with a unique design, this set of skis is handmade using unconventional materials that give an elegant yet bold look while improving the strength of the surface most exposed to stress and impacts. The Sten Skis feature a rounded silhouette with a classic sandwich composition, consisting of lightwood core, fiberglass, and Titanal (an isotropic high-tech aluminum alloy) covered entirely with a thin layer (1 mm) of natural slate applied using a special matrix. This set includes also Vist plates and bindings, and Zero poles.
