STRATI DEL MONDO SCULPTURE

\$2,050

DESCRIPTION

Timeless elegance and masterful attention to detail are the hallmarks of this sophisticated sculpture. The sphere is entirely handcrafted using wood from four continents: paduka with its subtle red hues, wenge with its dark tone, walnut, chestnut, and oak with their subtle shades of brown, and then ash, lime, and maple with their softer, straw colors. All these woods are layered together in a captivating array that highlights the grain of the dark woods and the delicacy of the light woods. Displayed in an entryway or living room, this piece will infuse elegance into any home.
