DESCRIPTION

Defined by a stunning interplay of bold architectural lines and soft textures, this wall sculpture will be the stand-out piece in any contemporary or minimalist decor. Simple geometric forms are covered in a soft suede, conferring a luxurious visual and textural quality. A central orange circle is framed by a U-shaped band in taupe, a top band in pink, and a bottom band in dark brown: the juxtaposition of such forms and materials reveals a captivating three-dimensional aesthetic. The mounting on a black nappa frame enhances the depth and the bold energy of the sculpture.
