TERRIFIC PALMETO SIDE TABLE

\$13,000

DESCRIPTION

Featured at Milan Design Week 2018, this sophisticated table combines Italian craftsmanship with Middle Eastern artistic influences, using a mix of materials that create a unique textural quality. The wooden frame has a tiered, round top covered in ivory fabric with a green frond pattern adorned with a studded trim. The smaller concentric tier underneath features a band of brass palm trees accented by studs. The distinctive base is composed by a hexagonal pedestal on a raised foot, both embellished with a geometric design made with strips of brass and zinc-coated sheets.
