## TIZIO E CAIO TALL TRAY TABLE

\$810

### DESCRIPTION

A versatile addition to any room in the house, this charming tray table combines both form and functionality in a single, original design. The Tizio e Caio is multi-functional, comprised of two separate elements: Caio, the durmast-finished wood top with cut-out sides that can be used as a separate tray, and Tizio, the base of white-varnished tubular steel that is in fact a table in itself. This versatile table is available in two heights that can be paired to form nesting tables, or in multiples to form an eye-catching coffee table.
