TONDOLO WHITE CONTAINER/VASE WITH LID BY FABIO TARAMASCO

\$480

DESCRIPTION

This playful object was developed from a concept by designer Fabio Taramasco who was inspired by the garden gnomes. What started as a simple drawing developed into a solid object marked by rounded forms that can be used both as vase and container. Crafted of ceramic and painted entirely by hand in glossy white, this playful object of functional decor showcases an acorn-shaped lid and a curvaceous body with an eclectic profile that mixes concave, convex, and curved lines. This piece makes a charming addition to a countertop or table, whether to display flowers or store cookies.
