## TORRE 1 LIGHT-SCULPTURE

\$2,880

### DESCRIPTION

Aptly named tower, this light-sculpture evokes the allure of skyscrapers that dominate a city's night skyline. Part of the Torri series inspired by Giorgio de Chirico's Squares of Italy, it is marked by a square base that rises to host a smaller, slender cylindrical element with the LED source that directs the light to the square reflecting top above. The exclusive finish results from applying layers of grey paint with a brush and subsequently sanding and polishing the surface to obtain a soft texture and color. Each piece will be unique and slight variations in colors are to be expected.

### DETAILS & DIMENSIONS

- Material: Iron
- Dimensions (in): W 5.91 x D 5.91 x H 39.37
- Dimensions (cm): W 15 x D 15 x H 100
- Handmade In Italy
