TOWER CUPBOARD

\$37,700

DESCRIPTION

This unique cupboard is a true work of art. Its bold and elegant front decoration is inspired by the dynamic geometries by Kandinsky and painted entirely by hand. The rectangular wooden structure rests on four conical feet with striking grooves, and has black sides and a natural-finished top. The front panels of doors and drawers boast a white background with a semi-glossy lacquer on which a series of pure geometric forms create a composition of explosive joy. Ideal for an elegant kid's room or an eclectic interior, this piece is also available in other designs. Please ask the Concierge for customization.
