TRAMONTANA SCULPTURAL OBJECT

\$1,025

DESCRIPTION

Handcrafted of lathe-turned cherry and finished with a protective water-based, non-toxic finish, this stunning object of decor is composed of three pieces that can be displayed in different combinations. The main piece is shaped like a footed urn with three large cylindrical holes inside. The removable lid, a dome surmounted by a wooden disk with a metal sphere, can also be placed on top of the third piece of the set, a solid semi-sphere. This remarkable object can display a flourishing floral arrangement or be used alone as an artistic accent in an entryway or on a coffee table.
