## TROG JR DINING TABLE

\$3,790

### DESCRIPTION

Characterized by spectacular sculptural appeal and strong personality, this Trog table is a fine exemplar of artistry and aesthetic. The mastery of this superb table is evident in the bold support column: the oak table top (available also in suar) is supported by a laser-cut iron column, coming to life through a series of dynamic lines and forms twisting in space, representing a dreaming soul in balance propped up amongst the clouds. The contrast between the bronzed iron finish and the natural light wood grain creates a distinctive textural character that will adapt to any space in any era.
