TSUKIMI CONSOLE

\$4,990

DESCRIPTION

Designed by Sakura Adachi, this striking console is made of maple wood with two distinct finishes: natural on the outside and with blue and natural stripes on the inside. The minimal, rectangular silhouette features an off-center, round mirror that cuts the top like a moon surrounded by clouds in the sky (Tsukimi refers to the Japanese tradition of holding parties to view the harvest moon). Placed in a living room or large hallway, this piece will make a statement in any decor.
