TUMBRELLA UMBRELLA STAND BY RICHARD HUTTEN

\$1,585

DESCRIPTION

Playful and functional, this umbrella stand will fit in residential or professional contexts with equal ease. Its silhouette, completed by a round base for steady structural support, is shaped like a partially furled umbrella, the cavity traced by its canopy-like element designed to host the umbrellas in a whimsical arrangement. A central, T-shaped shaft completes this luminous design in bronze-finished brass.
