TWO-ARM CACTUS SCULPTURE

\$770

DESCRIPTION

This striking ceramic sculpture designed by Tullio Manzotti depicts a cactus trunk with two arms extending on each side, one decorated with a flower. Its textured surface and remarkable details add both a strong personality and a charming decorative quality. The improbable hot pink color is in honor of the all-in-pink exhibition "Stranger Pinks" presented by Artemest at Fuorisalone during Milan Design Week 2018, which includes selected handmade decorative and furniture pieces created especially for this event.
