Studio Lievito

TYPE PASTAMETER

\$220

DESCRIPTION

Turning ordinary into extraordinary, Studio Lievito has created this innovative object whereby, by a simple turn, this block of Carrara marble becomes a measuring device for spaghetti pasta. Evoking the shape of the letter K, the marble block features four carved-out sections, each with a different shape that determines the right number of portions of spaghetti, from one to four. When not in use, this intriguing design can sit on the counter as a kitchen decorative accent.
