VERONESE SIDEBOARD

\$7,520

DESCRIPTION

Designed by the MAAM, (the museum of art and furnishing with which Morelato collaborates, promoting an international competition for young designers and each year developing prototypes of great interest), this sideboard is made of different wood types to create the visually striking cubic perspective of the front panels, reminiscent of the Renaissance art. Inside, the central space is equipped with three drawers, while outside the brass feet add sophistication and a modern touch.
