VERTIGO BLACK AND WHITE BOWL

\$310

DESCRIPTION

Made entirely using biodegradable, plant-based plastic, this striking bowl will be a perfect complement to the Vertigo Black and White Vase. Either placed upon a console, mantelpiece, or coffee table, it will be an eye-catching addition to a modern or contemporary home. It was made using a 3D printer of a combination of marble powder and PLA - a biodegradable and plant-based plastic. It was then finished and painted by hand with a visually imposing combination of black and white.
