## VERTIGO WHITE AND PINK MARBLE BOWL

\$2,640

### DESCRIPTION

Partnering with historical Sicilian masonry Petram, Serena Fanara created the collection Vertigo. Each piece of this collection is crafted using the CNC (Computer Numerical Control) technology. This bowl, made of Carrara marble, boasts sinuous curves, inspired by the movements of the algae underwater. The bottom of the piece is accented with an element in pink onyx. This striking object of functional decor is finished by hand and can be combined with others from the same series to create a superb decoration in an entryway or living room.
