## DESCRIPTION

A magnificent object of functional decor, this superb centerpiece is a work of art that belongs to a limited series of 333 items, all signed and dated by their master artisans. Shaped like a goblet, it will be an ideal fruit display on a modern dining table or a striking sculptural accent in a living room. Its sinuous curves are crafted of mouth-blown Murano crystal and adorned with the "mano volante" technique, with hand-application of ivory and orange while the glass is still hot. It takes 20 years to become master glassmaker and only the most skilled masters can execute this precious decoration.
