VRMBICOLR TURQUOISE AND AMBER VASE

\$1,520

DESCRIPTION

The incorporation of glass volumes in different colors and designs within a thick body in clear glass is possible with the "sommerso" technique, a traditional method employed for the deft crafting of this precious vase in polychrome Murano glass. A seemingly floating, amber-toned glass mass features a drop-like element in turquoise glass placed above, enveloped by a mantle of air bubbles trapped within the glass.
