Lucia Cavalli

WABI-SABI METAL STONES BOWL

\$535

DESCRIPTION

Handmade of brown refractory clay mixed with medium grain chamotte, this bowl is defined by a dynamic movement resulting from the optical quality of the iridescent surface and the irregular shape. The ripples enhance the earthy nuances of the metallic glaze, obtained with several firings at different temperatures. Purely decorative (it cannot contain water), this bowl will create a striking focal point on any surface where it can be paired with other pieces from the same artist.
