WASHINGTON BLACK AND WHITE COFFEE TABLE

\$1,380

DESCRIPTION

This striking coffee table was entirely made by hand and its shape is reminiscent of the delicate curves of the Capitol dome. The iron rods making its base are worked by an expert artisan and finished with a matte black color (also available in matte white). The round top is in the Nano techno material FENIX NTM®, and strikingly complements the black of the structure. It is also available in Laminam® ceramic, marble, lava stone, and GlassArt. Either alone or paired with another from the same series, this exquisite piece will make a statement in any modern setting.
